

Automatic Carton Forming and Bottom Sealing Machine Model : GPK-40

▶ Machine introduction :

Based on principle of 'easy to know how to operate at one glance for common users', Our engineering team develops GPK series carton erector which is suitable for complicated production environment through innovation and study on world carton-erecting technology. The erector with storage system up to 100 cartons, is equipped with alarm system which can remind operator to replenish cartons in time. Erecting system works fast and soft and it can protect cartons free from damage during erection. Bottom sealing system, one of the most advanced sealing technology, seals bottom covers of cartons clean and tidy for next production process

Automatic Carton Forming and Bottom Sealing Machine Model : GPK-40

▶ Machine Detail :

- Imported parts, electrical and pneumatic components;
- Vertical storage, cartons can be added at any time without stopping the machine;
- Suitable for forming and sealing cartons of the same size;
- Manually adjust to change the carton sizes (finishing in 2-3 minutes);
- Advanced photoelectricity induction control system;
- Rationally designed, the forming, folding and sealing process are accomplished simultaneously;
- Cutter Safety system to prevent hands from stabbed by the cutter;
- Heavy duty built, both steel and stainless steel types;
- Light in weight, high performance and speed.

▶ Main Technical Parameters :

Model	GPK-40
Forming and Sealing Speed	12 ctns/min
Carton storage quantity	100 pcs(1000 mm)
Carton size	L250-450 x W150-400 x H100-400
Power requirements	110/220V 1 phase 50/60Hz 200W
Air compressing	6 kg/cm ³
Air consumption	450NL/min
Machine size	L2000 x W1900 x H1450 mm
Machine weight	450 kg
Applicable tape size	48/60/75 mm
